EXPERIENCE

Competitive Solutions, Inc.   Product Manager   May 2019 - Present

- Lead development of three custom built websites for different clients using agile scrum principles (cbhscareconnections.com, mynetworktrac.com, and peer-rx-login.com)
- Gather user requirements and translate into stories
- Create wireframes, mockups and artifacts
- Manage sprint timelines and groom backlogs
- Test new features and enhancements prior to production release
- Troubleshoot bugs and assist in their correction
- Configure and manage devops and other services including: GitHub, Heroku, AWS EC2, Twilio, Route 53, SES, S3, Lambda, Apache, and Nginx

EDUCATION

Flatiron School   Full Stack Software Engineering Bootcamp   Aug 2020 - Present

- JavaScript   https://github.com/MikeBarberry-Flatiron/CatFacts
- HTML & CSS   https://github.com/MikeBarberry-Flatiron/CoralCollector
- SQL   https://github.com/MikeBarberry-Flatiron/MenuGenerator
- Sinatra, Rack and ORM
- Ruby
- Ruby on Rails
- React and Redux

(Non technical BA from Indiana University and MA from University College London)

PERSONAL PROJECTS

1. Website hosted on EC2 with Let's Encrypt on the Apache server for secure connections. Mostly written in HTML with CSS and JavaScript
2. CRUD website for displaying relationships; also hosted on EC2. Built with PHP, JQuery and HTML forms
3. Full stack MERN SPA hosted on Heroku.

See my website for links to the live projects and github repositories
